

Babak Myeloma Group

Department of Pathological Physiology, Faculty of Medicine, Masaryk University
is organizing:

7TH MYELOMA WORKSHOP DETECTION OF CELL CLONES IN MULTIPLE MYELOMA

at ILBIT, A3 University Campus MU Brno, Czech Republic
October 17 – 18, 2012

The 7th annual meeting will be focused on the possibility of detection of cell clones in multiple myeloma as well as research advances in monoclonal gammopathies. The workshop will be traditionally divided into theoretical and practical parts. Practical flow cytometry and genomic courses (FISH and aCGH) will be available. We believe that standardization of methods used in multiple myeloma plays an increasingly important role in promoting collaborative work.

This meeting should be attended by researchers, clinicians as well as laboratory technicians who are involved in patient care, research and routine diagnostic procedures.

Please confirm your attendance by email to potacova@med.muni.cz (deadline: September 1, 2012).

We look forward to seeing you in Brno.

With best regards,

Prof. MUDr. Roman Hajek, CSc.
