

SECOND

Patient and Family Seminar

When: October 2006
Where: Poděbrady

Spa - Poděbrady

The town Podebrady was established near an important crossing on the river "Elbe" in 1224.

A spring of mineral water was discovered when searching for drinking water in the courtyard of the castle.

Spa - Poděbrady

The first spa season began as the mineral water, with an excellent medical force in the carbonic spa, brought the predicted "golden age" of the town in 1908.

The town Poděbrady has become a favorite summer resort thanks to the successful health-results, eventful cultural, social and sports life and the beautiful natural setting.
